## Burdett's Top Dressing Sand

Burdett's Top Dressing Sand is a clean washed, easily spreadable fine sand which resists compaction. It is suitable for top dressing lawns & ovals in order to fill in low spots, assist with poor drainage and help smooth out uneven areas.

The following gradings are typical – current test results available upon request.

Particle Size (% retained)	
Very Coarse Sand (1.0mm)	< 5
Coarse Sand (0.5mm)	< 15
Medium Sand (0.25mm)	25 – 55
Fine Sand (0.15mm)	35 – 65
Very Fine Sand (0.05mm)	< 10
Silt and Clay (<0.05mm)	< 5
pH (1:5 water)	5.0 – 7.5

**Top Dressing Sand is available in bulk ex-bin or delivered.**

**Please contact sales for detailed information on availability and pricing.**
