

Technical Data Sheet

Burdett's Brick Sands

Burdett's Brick Sands are designed to provide good workability and durability and to deliver optimum mixing and ease of application.

Available in various shades depending on the final mortar colour required.

Ivory Brick Sand	Mukadilla Brick Sand	Orange Brick Sand
Off-white	Light tan	Yellow/Orange
Premium Brick Sand with an optimal blend of fattiness and workability. Burdett's whitest Brick Sand – use where a light coloured mortar is required.	Standard high-volume, economical Brick Sand. Designed for applications where a more neutral mortar colour is preferred.	High fattiness Brick Sand with a yellow/orange colour. Not recommended for tinting due to the large amount of pigment typically required.
		

Photos supplied are indicative and for comparison purposes only.

Note: colour may vary over time as these are natural products. To avoid mortar shade variation over the course of a job, please ensure that you order sufficient quantity to complete the project.

Burdett's Brick Sands are low in Sulphate, Chloride and organic impurities.

Brick Sands are available in bulk ex-bin or delivered.

Please contact sales for detailed information on availability and pricing.
