

Technical Data Sheet

Burdett's Glenrowan Toppings

Sourced from the heart of Victoria, Burdett's Glenrowan Toppings are a light-tan granitic sandy gravel. They are considered to be an alternative to Dromana, Tuscan or Lilycan Toppings depending on the desired surface appearance.

Glenrowan Toppings can be used for various applications such as driveways and pathways (see over page for photos of installed product).

With suitable compaction (e.g. vibrating plate) they will provide a firm base. For an even more durable surface, they can also be stabilised with cement at 3 – 5%.

Glenrowan Toppings should ideally be placed at a depth of 50 – 75 mm over an equivalent thickness of solid base such as crushed rock.

Note: Colour and sizing may vary as this is a natural product.

As delivered	After rain or washing
	
Nominal size: 10 mm minus	

Note: Glenrowan Toppings contain a significant amount of silt & clay which is integral to the nature of the product. This provides the ability to form a durable surface after compaction, particularly if cement stabilised. Note that appearance will improve over time after natural washing by rain or can be modified quickly by spraying with a garden hose.

Glenrowan Toppings are available in bulk ex-bin or delivered from Thompsons Road, Cranbourne.

Please contact sales for detailed information on availability and pricing.
